

Projects

Samay [↗](#)

Application

CREATOR

- Time tracking app using Pomodoro hour cycles with hierarchical tagging to various activities throughout the day.

Dronacharya [↗](#)

MoveHack

CREATOR

- Drone and UAV traffic management system to address the detection of drones and UAVs, unlawful trespassing by drones, collision avoidance, route monitoring and much more.

Sigrec [↗](#)

Axis Bank & Syndicate Bank

CREATOR

- Microservice designed as an end-to-end service that can be hosted independently to facilitate the workflow around signature recognition and analysis.

Paytm Scraping Offers [↗](#)

Open Source Project

CREATOR

- Framework to crawl and scrape all of the PaytmMall products and their associated information (categories, coupons, etc) in a relational database with an extended well-defined API to control the workflow of crawling and scraping.

Reposter [↗](#)

Open Source Project

CREATOR

- Declarative system to manage, monitor and deploy marketing in social-media by re-posting content from one place to the another with a super simple API and well-documented examples.

Urban Dict Bot [↗](#)

Open Source Project

CREATOR

- Twitter bot written as integration to Urban Dictionary allowing fun workflow around various 'urban' meanings of a given word in a presentable way.

Stephanie-VA [↗](#)

Open Source Project

CREATOR

- An open-source platform built specifically for voice-controlled applications as well as to automate daily tasks imitating much of a virtual assistant's work.

Elixir-Mix-OTP-Guide [↗](#)

Open Source Project

CREATOR

- Repository for the official guide to build a complete Elixir application, with its own supervision tree, configuration, tests and more at.

Several Other Projects [↗](#)

Side-Projects

CREATOR

- Various other projects that I built over my free time available at: [Slapbot/Projects](#) [↗](#)

Talks

PyData.org (Data Science Conference) [↗](#)

Delhi, India

SPEAKER FOR <PYDATA 2017>

September 2017

- Stephanie | Virtual Assistant At Your Service - A General Overview.

Pycon.org (Python Conference) [↗](#)

Hyderabad, India

SPEAKER FOR <PYCONF 2017>

October 2017

- The Journey to Jarvis v2.0 via Stephanie: Building your very own simple AI.

Pycon.org (Python Conference) [↗](#)

Delhi, India

COMMUNITY WORKSHOP FOR <PYCON 2017>

November 2017

- Gave a hands-on demo of Stephanie and how to build custom virtual assistants using the underlying framework.

Skills

Programming Languages: Python, PHP, Javascript, SQL, Solidity, Java, Bash, HTML, CSS

Software & Frameworks: Laravel, Vue.js, Flask, OpenCV, Keras, Tensorflow, Scikit-Learn, BeautifulSoup, Asyncio, Selenium, etc

Developer Tools: Git, GCP, Docker, Vagrant

Key Interests: Philosophy, Mathematics, Physics, Economics, Psychology, Football
